DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a coating composition, classified in class 524, subclass 495.
- II. Claim 6, drawn to a waterproofing material, classified in class 428, subclass 351.
- III. Claim 7, drawn to a rust-proofing material, classified in class 252, subclass 387+.
- IV. Claim 8, drawn to an anti-contamination material, classified in class 523, subclass 177.
- V. Claim 9, drawn to a sound-absorbing material, classified in class 252, subclass 62.
- VI. Claim 10, drawn to a soundproofing material, classified in class 252, subclass 62+.
- VII. Claim 11, drawn to a fiber grid material, classified in class 428, subclass 221+.
- VIII. Claims 12- 20, drawn to a process for producing coating compositions, classified in class 523, subclass 307.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species of diluent including:

alcohol,

benzene

acetone

Art Unit: 1714

petroleum ether

ether

carbon disulfide

carbon tetrachloride

toluene

ethereal oil.

Species of first additive including:

Liquid petroleum resin

Stearic Acid

Sulfuret

Zinc oxide

Mercaptobenzothiazole

Diphenylguanidine

Species of second additive including:

Epoxy

Polyurethane

Rubber chloride

Vinyl acetate acrylyl

Aluminum paint

Chloroprene rubber

Natural rubber

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. The election must identify one diluent, one first additive and one second additive. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kriellion A. Sanders whose telephone number is 571-272-1122. The examiner can normally be reached on Monday through Thursday 6:30-7:00.
